

XC2Picts™

Plug-In for XC2™ Backflow Prevention Management Software

With **XC2Picts™** you may store, view and print digital images, photos and scanned-in material, such as test reports, letters and other documents. **XC2Picts™** automatically compresses your digital images to as little as 4% of their original file size; for example, a sample 950mb photo compressed to 36kb. **XC2™** stores the compressed digital images in the single **XC2™** data file along with all the other information regarding the assembly.

You may store multiple images for a given assembly, along with the picture name, date, type and comments. You can quickly view thumbnail images of the stored pictures. You may expand images for more complete viewing as well as print images complete with associated information.

XC2™ can store up to 16 million images using **XC2Picts™** (dependent on hard disk space).

XC2Picts™ is currently priced: (Please call for Pricing)

XC2Picts™ requires QuickTime® v. 3.0 from Apple Computer to be installed on the computer using **XC2Picts™**. QuickTime is available for both MacOS and Windows. QuickTime is free and available as a download from the Apple Computer website: <http://www.apple.com/quicktime>. QuickTime is a trademark of Apple Computer
